PETPOOJA

BUSINESS UNDERSTANDING

BUSINESS SUMMARY

PETPOOJA

Petpooja is a restaurant technology platform that provides POS and restaurant management solutions. Its platform covers restaurant billing, inventory management, online order management, menu management, CRM, reporting and integrations.

Petpooja's current website positions its POS as an all-in-one solution for restaurant operations and highlights **100,000+ restaurants** using the platform. (Petpooja)

ABOUT US

Our journey began with a single mission: to build a restaurant POS that makes it easier for businesses to operate. That one product became the backbone of restaurants across the spectrum, from corner cafes and cloud kitchens to five-star fine dining and national QSR chains.

Along the way, we noticed something bigger. Every business we spoke to was fighting the same battle: unreliable systems, scattered tools, and software that was never really built for them.

So we started building an operating system for businesses. Payroll that handles attendance, compliance, and salaries without the chaos. A purchase manager who finds the lowest prices across platforms. Tasks that manage operations and keep every team accountable from one dashboard. Invoice, a retail POS with GST-ready billing, inventory, and P&L insights built in.

Today, more than 1,50,000 businesses across India, the UAE, and South Africa run on Petpooja. And we're only getting started.

OBJECTIVES

- Increase brand awareness among restaurant owners.
- Increase organic website traffic.
- Generate qualified demo leads.
- Increase free-demo bookings.
- Improve rankings for restaurant POS-related keywords.
- Increase traffic from high-intent commercial and transactional searches.
- Build stronger visibility on Google and YouTube.
- Increase engagement on Instagram, Facebook and LinkedIn.
- Generate leads through Google Ads and Meta Ads.
- Improve customer retention through CRM, email and WhatsApp marketing

CHALLENGES

Challenge	Digital Marketing Solution
High competition	Competitor-focused SEO + strong USP
Low awareness of restaurant technology	Educational blogs, videos and social media
Staff adoption/training	Tutorials, webinars and YouTube videos
Different restaurant segments	Audience-specific landing pages
Integration concerns	Feature pages, comparison content and case studies
Customer support expectations	Support-focused content and testimonials
Pricing/feature comparison	Comparison pages and lead-generation campaigns
Generating qualified leads	Google Search Ads + Meta Lead Ads + remarketing

SWOT ANALYSIS FOR PETPOOJA

1. STRENGTHS

- **Market Leader in Indian F&B POS:** Trusted by 1,00,000+ restaurant outlets across India.
- **Robust Ecosystem & Integrations:** 150+ third-party integrations (Swiggy, Zomato, payment gateways, accounting software) and an app marketplace with 120+ add-ons.
- **Comprehensive All-in-One Solution:** Covers billing, inventory management, dynamic reporting (80+ reports), CRM, and KOT management under a single platform.
- **High Reliability & Scalability:** Designed for high-volume order processing with local offline sync support to prevent downtime during internet outages.

2. WEAKNESSES

- **Feature Overload for Small Outlets:** 200+ features and deep modules can create a steep learning curve for non-tech-savvy staff at standalone local eateries.
- **Website Lead Conversion Leaks:** High traffic volume requires constant optimization to ensure visitor bounce rates don't impact demo requests and sign-ups.
- **Customer Support Dependency:** Serving 1,00,000+ outlets means support turnarounds during peak dining hours (weekends/nights) require continuous scaling.

3. OPPORTUNITIES

- **Tier-2 & Tier-3 City Expansion:** Rapid digitization of regional F&B markets presents a massive opportunity for affordable cloud POS adoption.
- **AI-Driven Analytics & Automation:** Upselling AI features (like smart inventory prediction, auto-upselling, and voice reporting) to boost subscription average revenue per user (ARPU).
- **Global Market Expansion:** Scaling footprint across Middle East (UAE) and Southeast Asian restaurant markets with localized language and tax features.

4. THREATS

- **Intense Market Competition:** Pressure from competitors (like Posist/Restroworks, UrbanPiper, Toast, and regional players) offering aggressive pricing strategies.
- **Price Sensitivity among SMEs:** Small cafes and food trucks are cautious with subscription pricing and hardware upgrade costs.
- **Aggregator Policy Shifts:** Frequent changes in Swiggy/Zomato API policies or fee structures can disrupt operational sync for merchants.

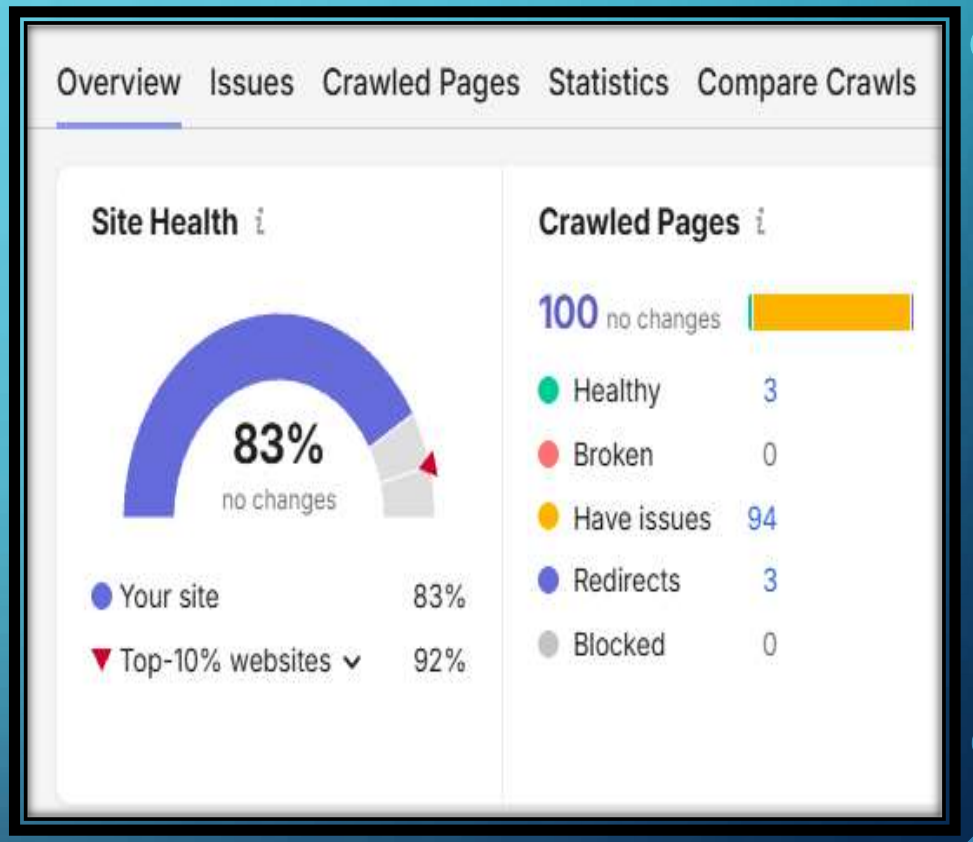

PETPOOJA

SEO AUDIT & GROWTH PLAN

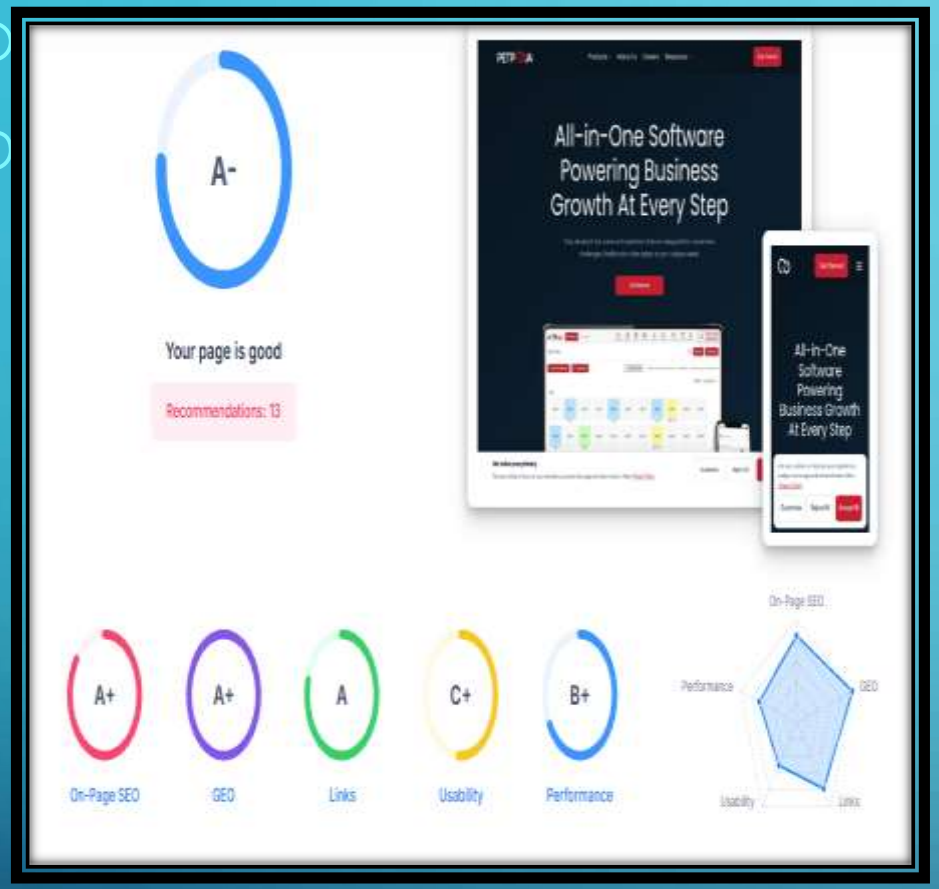

WEBSITE CURRENT SCENARIO

The Petpooja website achieved a Site Health Score of 83%, indicating a relatively strong technical SEO foundation. However, the audit identified issues on 94 of the 100 crawled pages, showing significant scope for technical and on-page optimization. No broken or blocked pages were detected, while 3 redirects were identified. Addressing the reported technical issues, optimizing on-page elements, improving internal linking, and reviewing redirects can help Petpooja improve its overall SEO health and move closer to the 92% benchmark.

OVERALL SEO AUDIT

Source: SEOptimer

Please note , the data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics.

Overall Strategic Insight

The Petpooja website demonstrates a strong overall digital and SEO foundation, achieving an A- audit score. On-Page SEO and GEO are the strongest areas, both receiving an A+, while the linking structure also performs well with an A grade. However, website performance received a B+ and usability received a C+, indicating opportunities to improve page speed, mobile experience, navigation and overall user experience. The audit identified 13 recommendations that can be addressed to further strengthen the website's technical performance, user engagement and search visibility.

Priority Matrix for Your Project

High Priority

- Improve usability – C+
- Review and implement the 13 recommendations
- Improve mobile user experience
- Optimize page loading speed

Medium Priority

- Improve Core Web Vitals
- Strengthen internal linking
- Optimize images and page resources

Maintain

- On-Page SEO – A+
- GEO – A+
- Link structure – A

WEBSITE AUTHORITY

Key Points

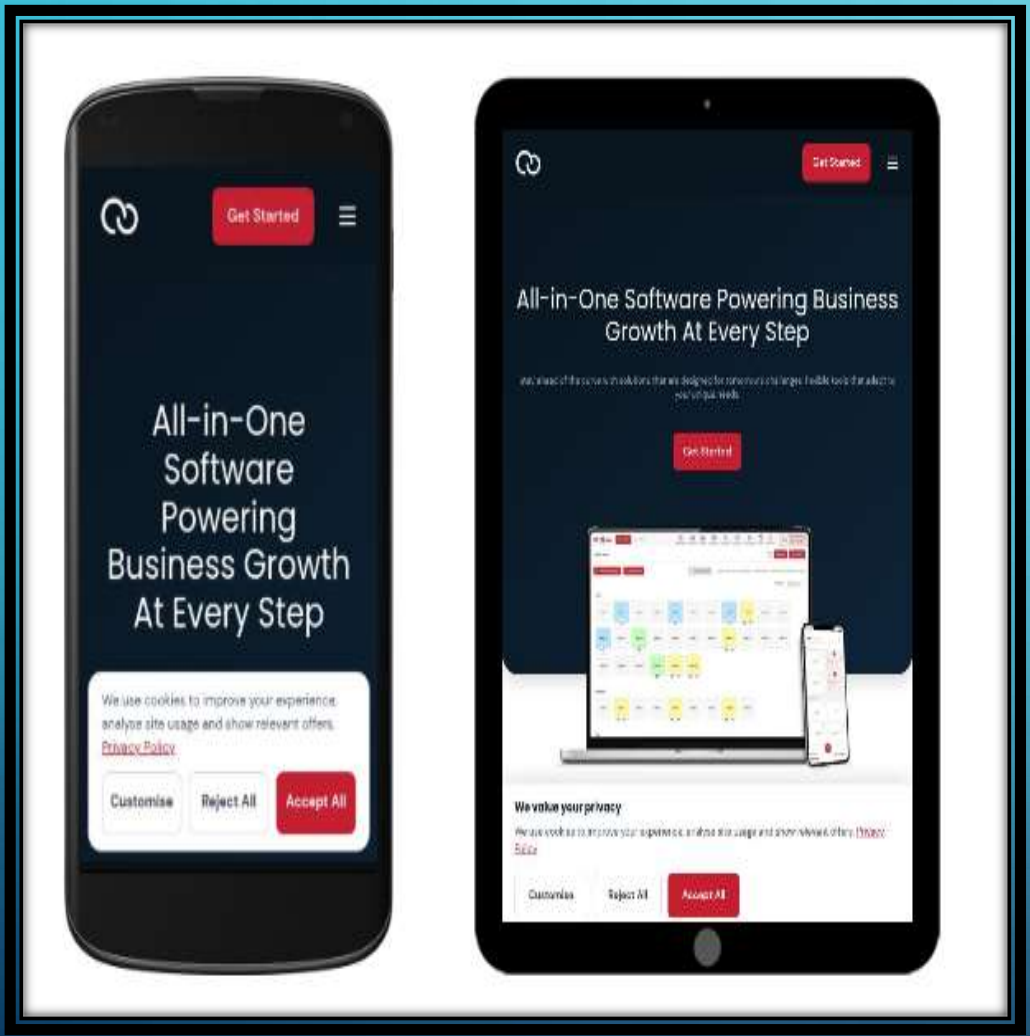

- **DA 34:** Petpooja has a moderate level of domain authority. Building more **high-quality, relevant backlinks** can help strengthen overall domain authority.
- **PA 48:** The homepage has a stronger authority score than the overall domain, indicating that the main page has accumulated meaningful authority.
- **Spam Score 4%:** This is relatively low, which suggests there isn't a major spam-related concern in the backlink profile based on this metric.
- **20+ years of domain age:** The domain has a long history, which provides an established foundation for SEO. However, domain age alone does not guarantee high rankings.
- **Overall opportunity:** The combination of **DA 34 + PA 48 + 4% spam score** suggests that Petpooja has a solid base but can focus on **quality link building, digital PR, industry publications, guest contributions, and relevant partnerships** to improve authority.

Source: DA Checker

Please note, the data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics.

PAGE RENDERING CHECK

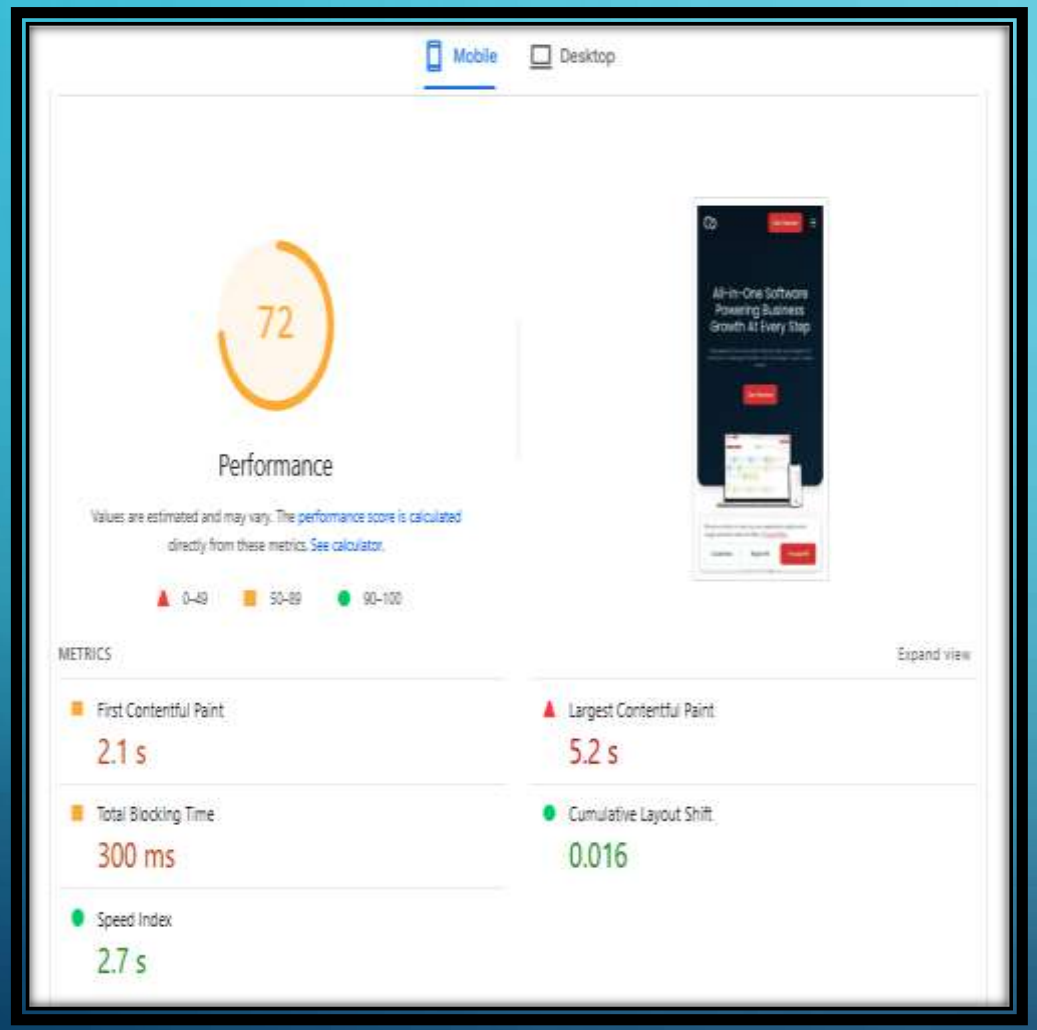

Petpooja's page demonstrates good responsive rendering across mobile and tablet devices. The primary headline, CTA and product visuals remain visible and appropriately structured at different screen sizes. However, the cookie-consent banner occupies a considerable portion of the mobile viewport, which could affect the initial user experience. Further testing of Core Web Vitals, tap-target sizes, font readability, page speed and mobile navigation would help ensure a stronger mobile experience.

Please note, the data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics.

Source: SEOptimer

PAGE SPEED CHECK-MOBILE

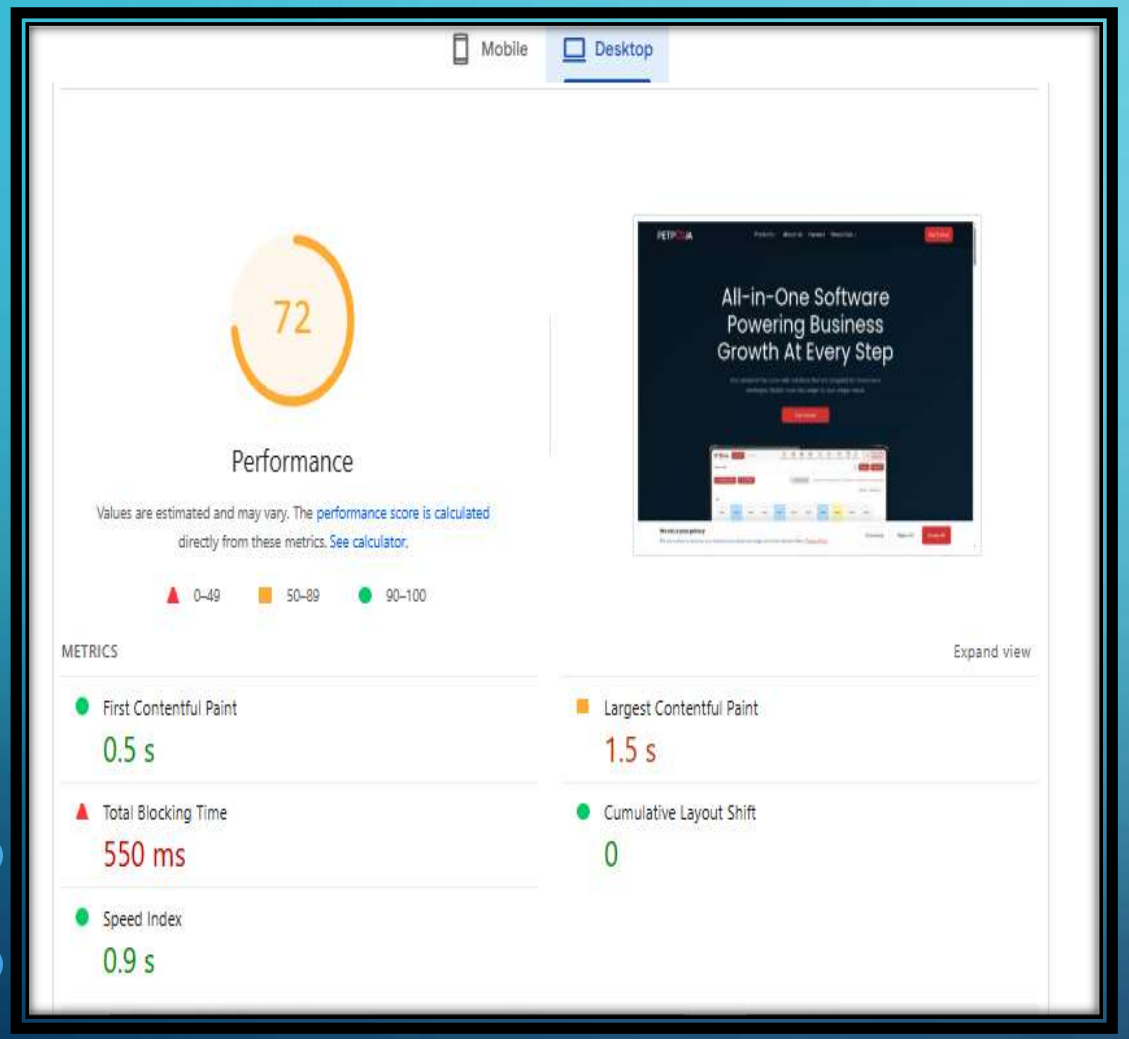

INSIGHTS

- The current Web Page Speed score on Mobile is **72**
- To enhance overall performance and ensure a seamless user experience, it is recommended to achieve a score between 90 and 100 on both platforms

Source: Page Speed Insights

Please note, the data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics.

PAGE SPEED CHECK-DESKTOP

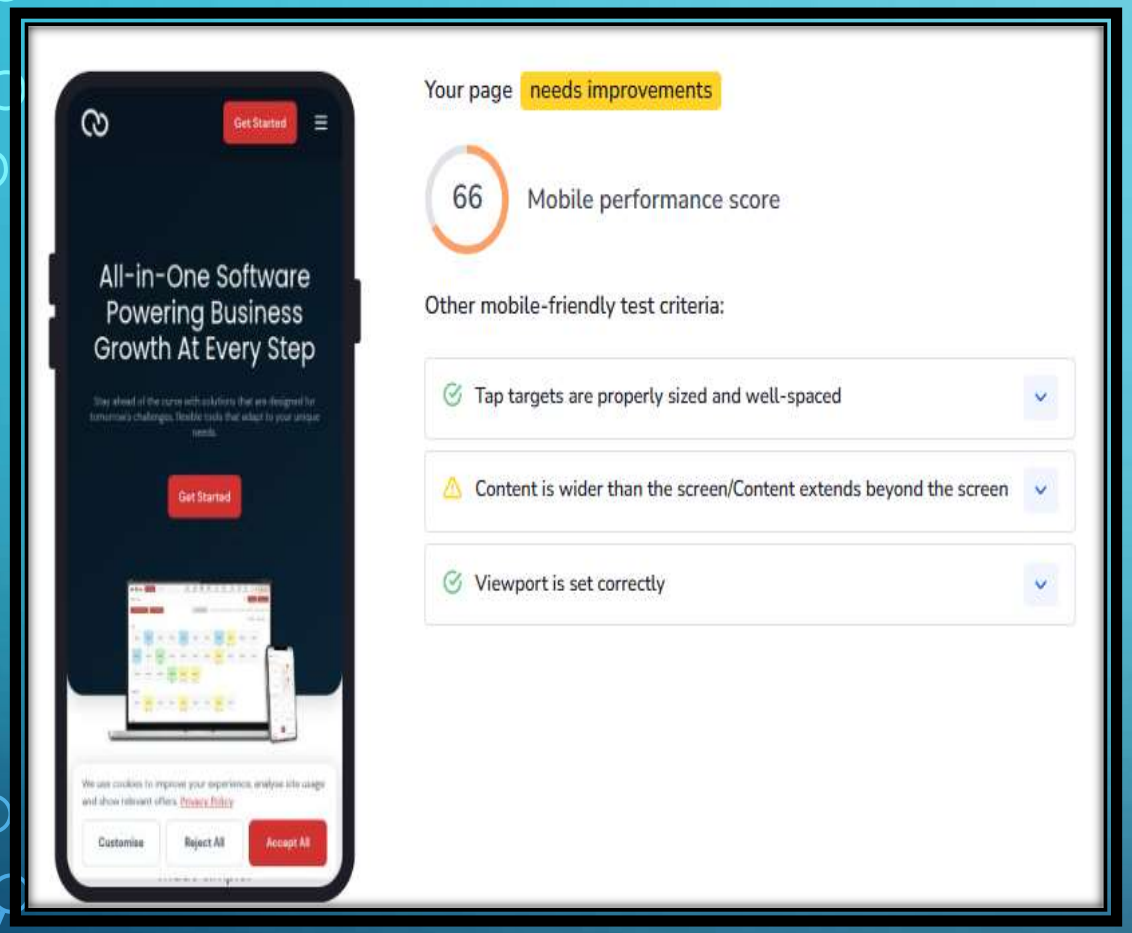

INSIGHTS

- The current Web Page score on Desktop is **72**
- To enhance overall performance and ensure a seamless user experience, it is recommended to achieve a score between 90 and100 on both platforms.

Source: Page Speed Insights

Please note, the data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics

MOBILE FRIENDLINESS CHECK

Source: SE Ranking

Petpooja has a mobile performance score of 66, indicating that improvements are required. The viewport and tap targets are properly optimized, but content extends beyond the screen, creating a horizontal overflow issue. Optimizing responsive elements, images, and container widths can improve mobile usability, performance, and overall user experience

WEBSITE TRAFFIC ANALYSIS

Key Insight Points

1. Strong Traffic Volume – 9M Visits

The website records approximately **9 million visits**, indicating substantial online visibility and audience reach.

2. Bounce Rate – 28.95%

A bounce rate of **28.95%** suggests that a large proportion of visitors continue beyond their initial landing page rather than leaving immediately. This can indicate good relevance and engagement, although the appropriate benchmark varies by website type and traffic source.

3. Pages per Visit – 4.39

Visitors view an average of **4.39 pages per visit**. This suggests that users are exploring multiple sections of the website rather than viewing only one page.

4. Average Visit Duration – 4:47

An average session duration of **4 minutes 47 seconds** indicates meaningful time spent on the website. Combined with the pages-per-visit figure, this suggests visitors are actively exploring the available content.

Please note, the data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics.

WEBSITE TRAFFIC ANALYSIS

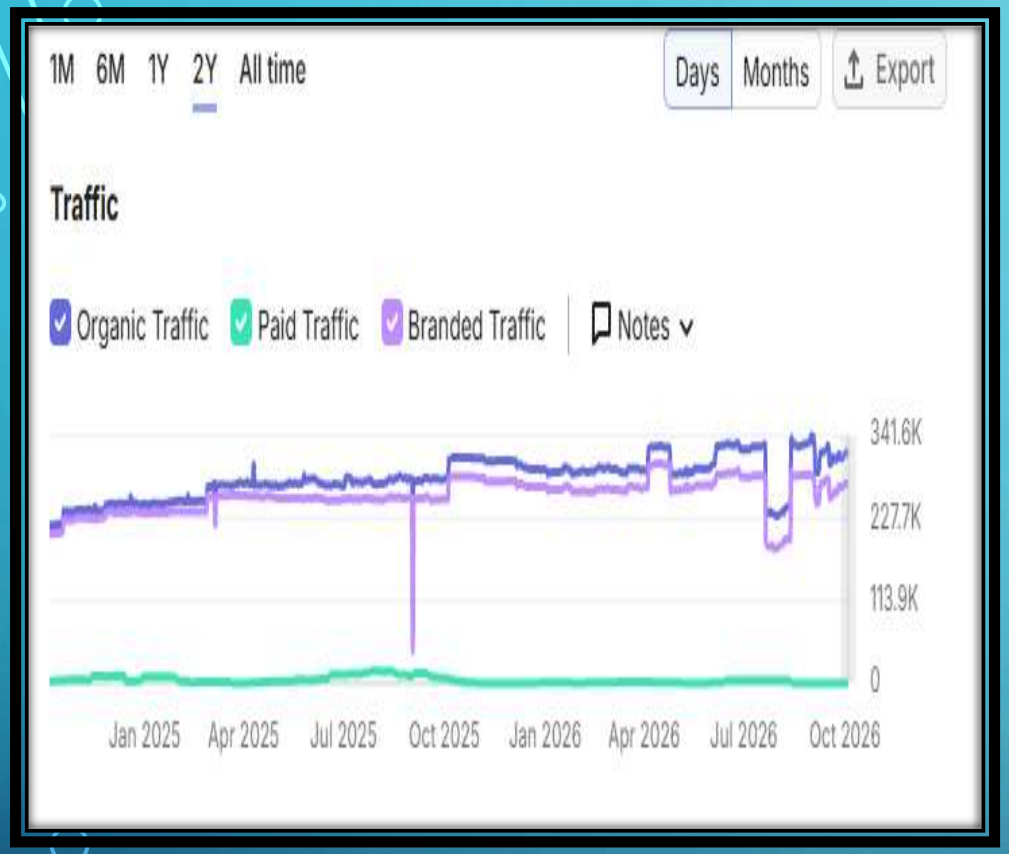

Source: Similarweb

Please note, the data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics.

Petpooja demonstrates strong and growing website traffic, with approximately 9M visits and a 16.13% increase in the latest month. Traffic shows a gradual upward trend over the three-month period from June to August. The 28.95% bounce rate, 4.39 pages per visit and 4:47 average visit duration indicate meaningful user engagement. With a large and growing traffic base, Petpooja has an opportunity to further improve lead generation and conversions through CRO, targeted landing pages, strong CTAs, remarketing and personalized content.

ORGANIC TRAFFIC

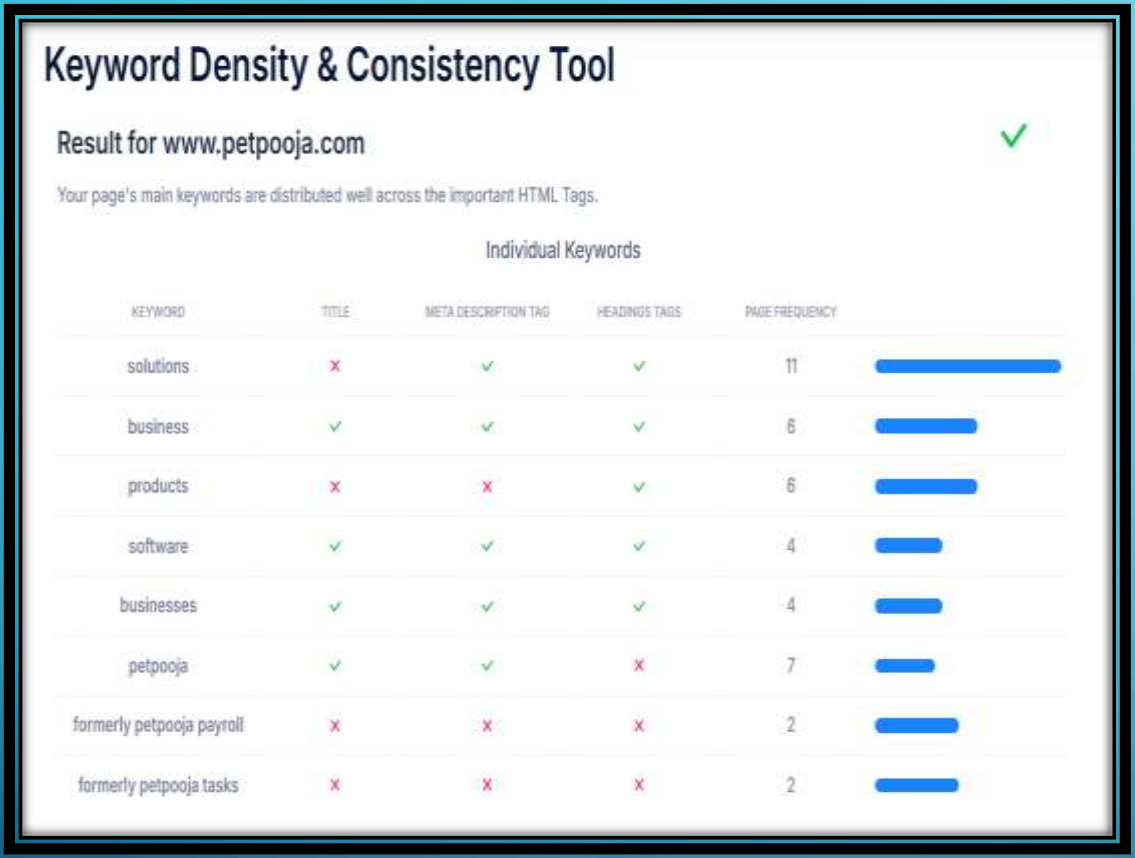

Source: Semrush

Please note, the data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market

- **Overall positive growth:** Petpooja's organic traffic shows a **gradual upward trend** over the two-year period, indicating improving organic search visibility.
- **Strong organic traffic volume:** Organic traffic remains consistently high, reaching approximately **300K–340K visits** toward the later part of the period.
- **Growth becomes stronger in 2026:** The graph shows higher traffic levels during **2026 compared with early 2025**, suggesting continued SEO growth and better search performance.
- **Temporary traffic drops:** There are a few **sharp fluctuations/drops**, particularly around **September 2025 and July–August 2026**. These could potentially be associated with Google algorithm updates, technical SEO issues, ranking changes, or seasonal demand.
- **Traffic recovers after drops:** A positive sign is that organic traffic **rebounds relatively quickly after major declines**, showing that the website has a strong underlying organic presence.
- **Paid traffic contribution appears minimal:** The green paid-traffic line remains almost flat and very low compared with organic traffic, indicating that **organic search is the primary traffic acquisition channel** in this graph.
- **Branded traffic is significant:** Branded traffic stays relatively close to organic traffic, suggesting that **brand searches contribute substantially to Petpooja's overall search visibility**.

KEYWORD CONSISTENCY

Keyword Density & Consistency Tool

Result for www.petpooja.com

Your page's main keywords are distributed well across the important HTML Tags.

Individual Keywords

KEYWORD	TITLE	META DESCRIPTION TAG	HEADINGS TAGS	PAGE FREQUENCY
solutions	x	✓	✓	11
business	✓	✓	✓	6
products	x	x	✓	6
software	✓	✓	✓	4
businesses	✓	✓	✓	4
petpooja	✓	✓	x	7
formerly petpooja payroll	x	x	x	2
formerly petpooja tasks	x	x	x	2

Source: SEOptimer

Please note, the data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics.

- **Strong Core Alignment ("business" & "software"):** Core high-intent terms like **"business"** and **"software"** show full consistency across all critical HTML tags (Title, Meta Description, Headings) and maintain balanced page frequencies.
- **Brand Name Missing in Headings ("petpooja"):** The brand name **"petpooja"** is present in the Title and Meta Description, but absent from Heading tags (<h1>, <h2>, etc.). Incorporating it into main section headings (e.g., "Why Choose Petpooja POS?") can strengthen brand keyword signals.
- **High Frequency for Generic Terms ("solutions"):** **"solutions"** is the most frequent keyword (11 occurrences) but is missing from the Title tag. Generic keywords carry lower SEO search intent compared to industry-specific phrases like "restaurant POS software" or "billing software."
- **Cannibalization / Redundancy ("business" vs. "businesses"):** The singular **"business"** (6 times) and plural **"businesses"** (4 times) appear as separate keywords across identical tags. Consolidating these references can prevent dilution of keyword weight.

ORGANIC KEYWORD ANALYSIS

Source: Semrush

Please note, the data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics.

- **Strong Overall Traffic & High Commercial Value:** The domain generates **314.6K monthly organic visits** from **6.5K keywords**. The estimated organic **Traffic Cost is $152.3K**, indicating that the rankings captured are highly valuable and would cost significant ad spend to replicate via paid search.
- **Significant Keyword Drop (Feb–Mar 2026):** Around February–March 2026, total ranking keywords dropped sharply from roughly **8K+ down to ~4.8K**. This drop primary affected lower-ranking long-tail keywords in the **51–100 (light blue)** and **21–50 (medium blue)** position buckets.
- **Core Rankings & Traffic Remained Resilient:** Despite losing non-ranking/low-position keywords in early 2026, the overall **Traffic line (314.6K)** remained steadily flat/slightly increasing. This indicates that top-performing commercial keywords (Top 3 and positions 4–10) maintained their rankings and continued driving the majority of qualified visits.
- **Active Keyword Recovery (Jul–Sep 2026):** From July 2026 through September 2026, organic visibility showed a strong rebound, expanding back up near the **6.5K keyword threshold**.

IMPROVEMENT RECOMMENDATIONS

- **Meta Description Tag :** Your page has a Meta Description Tag however, your Meta Description should ideally be between 120 and 160 characters (including spaces).
- **Website Load Speed :** Your page loads slowly. Page load speed is critical to ensuring good user experience and is becoming a more important ranking factor. Load speed can be impacted by a multitude of factors however and may need technical resources to investigate.
- **Image Alt Attributes :** You have images on your page that are missing Alt Attributes. We found 93 images on your page and 1 of them are missing the attribute. Alt Attributes are an often overlooked and simple way to signal to Search Engines what an image is about, and help it rank in image search results.

Source: SEOptimer

Please note, the data presented is subject to change over time due to evolving metrics such as performance fluctuations , strategic adjustments, and external market dynamics

IMPROVEMENT RECOMMENDATIONS

- **Friendly Links :** Some of your link URLs do not appear friendly to humans or search engines. We would recommend making URLs as readable as possible by reducing length, file names, code strings and special characters.
- **Amount of Content :** Your page has a low volume of text content which search engines can interpret as 'thin content'. Word Count: 662, It has been well researched that higher text content volumes are related to better ranking ability in general.
- **Google's PageSpeed Insights – Mobile :** Google is indicating that your page is scoring poorly on their Mobile PageSpeed Insights evaluation. Note that this evaluation is being performed from US servers and the results may differ slightly from an evaluation carried out from Google's PageSpeed Web Interface as that reporting localizes to the region in which you are running the report. Google has indicated that the performance of a webpage is becoming more important from a user and subsequently ranking perspective.

Source: SEOptimer

Please note, the data presented is subject to change over time due to evolving metrics such as performance fluctuations , strategic adjustments, and external market dynamics

IMPROVEMENT RECOMMENDATIONS

- **SPF Record :** This site does not appear to have an SPF record. SPF records are important to improve email deliverability and combat spoofing.
- **Address & Phone Shown on Website :** We can't identify one or both of these components on the page. Missing: Address
- **X (formerly Twitter) Account Linked :** No associated X Profile found as a link on your page.
- **Inline Styles :** Your page appears to be using Inline Styles. nline Styles are an older coding practice and discouraged in favor of using CSS style sheets, due to their ability to degrade page load performance and unnecessarily complicate HTML Code.

Source: SEOptimer

Please note, the data presented is subject to change over time due to evolving metrics such as performance fluctuations , strategic adjustments, and external market dynamics

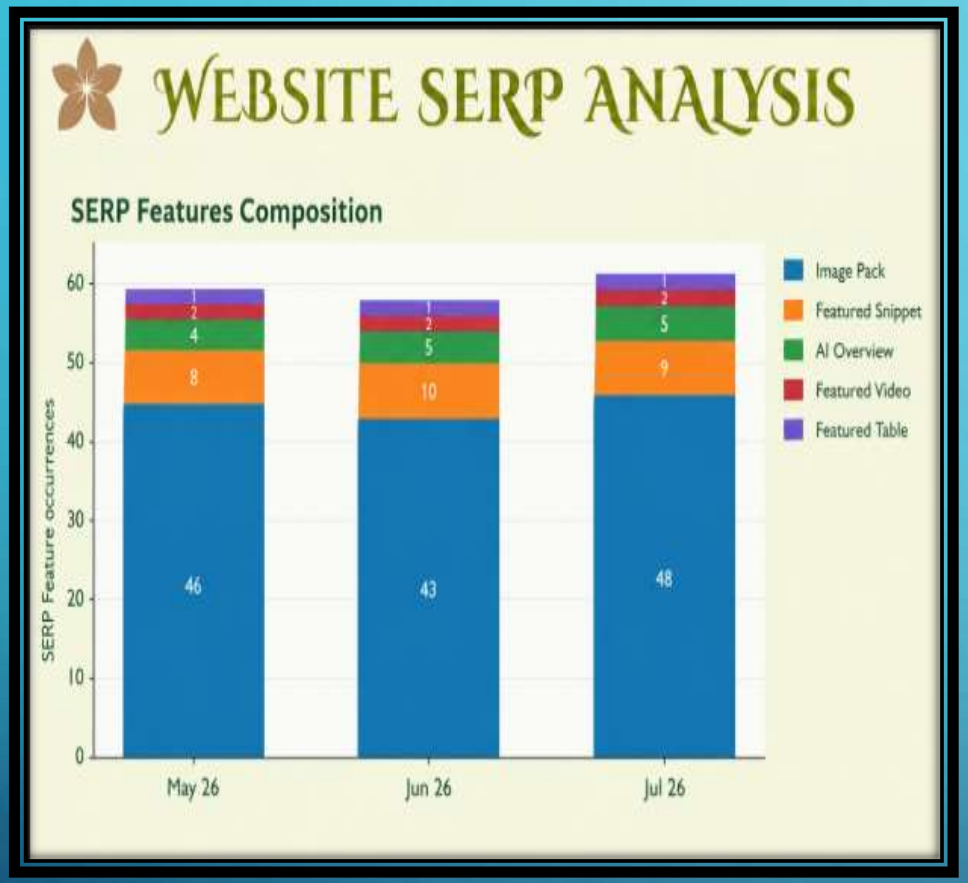

IMPROVEMENT RECOMMENDATIONS

- **Email Privacy :** Email addresses have been found in plain text. We recommend removing any plain text email addresses and replacing them with images or contact forms. Plain text email addresses can be susceptible to scrapers and email spammers.
- **Image Dimensions :** Some images on your page do not have explicit width and height attributes. This can cause the page layout to shift while loading, making the page feel unstable.

Please note, the data presented is subject to change over time due to evolving metrics such as performance fluctuations , strategic adjustments, and external market dynamics

WEBSITE SERP ANALYSIS

Source: SEOptimer

Please note, the data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments, and external market dynamics

- **Image Pack Dominance**: Image Pack is the most prominent SERP feature, indicating strong visibility potential for product images, restaurant setups, and POS screenshots.
- **Featured Snippet Opportunity**: Featured Snippet visibility remains comparatively smaller but shows improvement, creating an opportunity to optimize FAQs and concise answer-based content.
- **AI Overview Growth**: AI Overview visibility increases from May to July, suggesting that Petpooja should strengthen clear, entity-focused, and answer-ready content.
- **Video & Table Opportunities**: Featured Video and Featured Table visibility remain low, creating opportunities for product-demo videos, how-to content, comparison tables, and structured data.
- **Broad Keyword Opportunities**: Petpooja covers multiple areas such as restaurant POS, inventory management, online ordering, analytics, and restaurant types, providing several opportunities to target different SERP features.

SUGGESTIVE KEY IMPROVEMENT AREAS

- **Strengthen technical SEO and Core Web Vitals:** Improve page loading speed, optimize large images, reduce unnecessary scripts and maintain strong mobile performance to provide a faster user experience.
- **Improve on-page SEO:** Optimize page titles, meta descriptions, H1/H2 headings and primary keywords around terms such as **restaurant POS software, restaurant billing software, inventory management software and online ordering software**. Petpooja already has dedicated landing pages for several of these topics.
- **Enhance image SEO:** Add descriptive filenames, relevant ALT text and captions to product/interface images. Petpooja uses numerous product and feature images across its landing pages, creating an opportunity to improve Image SERP visibility.
- **Expand structured data implementation:** Use relevant **FAQ, Breadcrumb, Organization, Product/Software and LocalBusiness schema** where applicable to help search engines understand the site's content and improve eligibility for rich results.
- **Build stronger content clusters:** Expand supporting content around **Restaurant POS, Billing, Inventory, Online Ordering, CRM, Menu Management and Restaurant Analytics**, and connect these articles with relevant product pages through contextual internal links.
- **Optimize FAQ and PAA opportunities:** Petpooja already includes FAQs on its product pages. Expanding these with genuine customer questions can help target **People Also Ask and Featured Snippet** opportunities.
- **Strengthen local and international SEO:** Petpooja has country/location versions and serves multiple markets. Each regional page should have clearly differentiated localized content, appropriate metadata and consistent regional targeting.

WEBSITE GEO DISTRIBUTION ANALYSIS

Source: Semrush

Please note, the data presented is subject to change over time due to evolving metrics such as performance fluctuations, strategic adjustments,and external market dynamics.

- **Majority Traffic from India:**

Around **68.42% of total visits come from India**, highlighting India as the primary market for Petpooja and aligning with its focus on the Indian restaurant industry.

- **International Presence:**

Petpooja receives traffic from countries such as the **United States, UAE, UK, and Canada**, indicating international interest in its restaurant-management solutions.

- **Mobile Dominance:**

81.3% of total visits are from mobile devices, showing that most users access Petpooja through smartphones. Mobile responsiveness, page speed, and mobile UX should therefore remain key priorities.

- **International Growth Opportunities:**

Countries such as the **US, UAE, UK, and Canada** provide opportunities for localized content, country-specific landing pages, and targeted SEO campaigns.

- **Mobile-First SEO Opportunity:**

Since mobile traffic is significantly higher than desktop traffic, Petpooja should prioritize **mobile-first design, fast loading pages, easy navigation, and clear CTAs** to improve engagement and conversions.

4 PILLARS OF SEO

CONTENT CREATION & ENHANCEMENT

- Focus on high-quality content
- Valuable content integrate relevant
- Targeted keywords Maintain consistency through regular updates

BACKLINK STRATEGY

- Build authoritative, high-quality backlinks
- Target backlinks from niche-relevant sources
- Ensure a diverse and natural link profile

CRO & USER EXPERIENCE

- Improve website navigation for better usability
- Optimize page load times for faster access
- Make sure the site is fully responsive on mobile devices

ANALYTICS & OPTIMIZATION

- Monitor and evaluate traffic sources
- Refine user journey to boost conversions
- Work on lowering the bounce rate

TARGET LOCATION

TARGET LOCATION STRATEGY

- **Major Indian Metro & Tier-2 Cities**
  Focus on cities with a high concentration of restaurants, cafés, QSRs, cloud kitchens and multi-outlet businesses.
- **Key Indian Restaurant Markets**
  Target **Mumbai, Delhi NCR, Bengaluru, Hyderabad, Chennai, Pune, Ahmedabad, Kolkata, Jaipur and Surat** through location-focused SEO and landing pages.
- **Emerging Tier-2 & Tier-3 Cities**
  Expand visibility in growing restaurant markets such as **Lucknow, Chandigarh, Indore, Kochi, Coimbatore, Bhubaneswar, Nagpur and Vadodara**.
- **International Markets**
  Petpooja already provides localized experiences for **UAE, Singapore, Malaysia, Thailand, South Africa, USA and Canada**, making these relevant markets for international SEO.
- **UAE – Priority International Market**
  Build stronger location-based visibility across **Dubai, Abu Dhabi, Sharjah and other UAE cities**. Petpooja currently has UAE-specific POS pages and states that it serves 500+ restaurants across the UAE.

TARGET LOCATION EXPANSION STRATEGY

WHAT THEY'RE DOING	WHAT CAN IMPROVE
Strong presence across Indian restaurant markets. Petpooja focuses on restaurant businesses through POS, billing, inventory and restaurant-management solutions.	Expand deeper into Tier-2 & Tier-3 Indian cities where cafés, QSRs, cloud kitchens and independent restaurants are growing.
Already expanding internationally, particularly in the UAE. Petpooja has a dedicated UAE platform and reports 500+ UAE restaurants.	Increase city-level targeting in the UAE with dedicated SEO landing pages for Dubai, Abu Dhabi, Sharjah and other major restaurant markets.
Targets multiple restaurant formats, including fine-dine, QSR, cafés, food courts, bakeries, pizzerias and cloud kitchens.	Create location + business-type landing pages, e.g. "QSR POS Software in Dubai", "Cafe POS Software in Abu Dhabi" and "Cloud Kitchen POS in Sharjah."
Supports multi-outlet and large restaurant chains with centralized management across regions, cities and outlets.	Target restaurant-chain hubs and metropolitan areas where businesses operate multiple outlets and central kitchens.
UAE localization is already strong, including VAT-ready invoicing, local delivery integrations and multilingual support.	Replicate the localized SEO approach in other international markets by creating country-specific content, keywords and landing pages.

TARGET AUDIENCE

TARGET AUDIENCE	KEY CHARACTERISTICS
Restaurant Owners & Operators	• Owners of small, medium & established restaurants• Need billing, inventory & restaurant management solutions• Looking to reduce manual work and improve operational efficiency• Interested in digital POS and automated reporting
QSR, Café & Cloud Kitchen Owners	• Quick-service restaurants, cafés, bakeries & cloud kitchens• High volume of dine-in, takeaway or online orders• Need fast billing and order management• Require integration with delivery platforms and centralized kitchen operations
Fine-Dine & Food Court Businesses	• Restaurants with multiple tables, counters or service stations• Need table/counter management and faster order processing• Require inventory and employee management• Focus on improving customer service and operational control
Multi-Outlet & Restaurant Chains	• Businesses operating multiple outlets across cities• Need centralized menu, inventory and outlet monitoring• Require consolidated reports and central-kitchen management• Looking for scalable restaurant technology as they expand

TARGET LOCATION EXPANSION STRATEGY

WHAT THEY'RE DOING

- Strong presence across major Indian markets.
- Serving restaurants, QSRs, cafés & food courts.
- Supporting multi-outlet restaurant chains.
- Expanding beyond India into international markets.

WHAT CAN IMPROVE

- Expand into **Tier-2 & Tier-3 cities.**
- Target **emerging restaurant & QSR clusters.**
- Build **city-specific SEO landing pages.**
- Use local partnerships and targeted campaigns.
- Strengthen expansion across **Middle East & Southeast Asian markets.**

TARGET AUDIENCE

TARGET AUDIENCE	KEY CHARACTERISTICS
Restaurant Owners & Managers	Independent restaurants • Single/multiple outlets • Need billing & inventory
QSR & Fast-Food Businesses	High order volume • Multiple counters • Combos & online orders
Cafés, Bakeries & Fine Dining	Customer-service focused • Billing • Inventory • Digital ordering
Cloud Kitchen Owners	Delivery-focused • Multiple brands • Online-order management
Large Chains & Franchises	Multi-location • Centralized management • Standardized operations
New Food-Business Entrepreneurs	New restaurants • Startups • Looking for all-in-one POS solutions

TOTAL ADDRESSABLE MARKET FUNNEL

TAM – TOTAL ADDRESSABLE MARKET

India Restaurant Management Software Market

USD 365.7 Million (≈ ₹3,050 Crore) in 2026

- Includes the overall market for **restaurant management software**, covering POS, billing, inventory, reporting, ordering and operational management.
- India's restaurant management software market was estimated at **USD 303.6 million in 2025** and is projected to reach **USD 1.58 billion by 2033.**
- The market is growing rapidly as restaurants adopt **cloud POS, digital ordering, inventory management and analytics.**

TOTAL ADDRESSABLE MARKET FUNNEL

SAM – SERVICEABLE AVAILABLE MARKET

Restaurant POS & Management Software Segment in India

≈ USD 90–100 Million (≈ ₹750–830 Crore) annually

- Focuses on restaurants that actively need **POS, billing, inventory, KOT, online-order integration and reporting.**
- Petpooja's core offering directly targets this segment through its restaurant POS platform.
- Target customers include **QSRs, cafés, cloud kitchens, fine-dining restaurants, independent restaurants and restaurant chains.**
- India’s restaurant POS market is expected to continue expanding as more restaurants adopt digital billing and operational technology.

TOTAL ADDRESSABLE MARKET FUNNEL

SOM – SERVICEABLE OBTAINABLE MARKET

Petpooja's Realistic Near-Term Opportunity

≈ USD 15–20 Million (≈ ₹125–165 Crore) annually

- Focus on acquiring more **small & medium restaurants, QSRs, cafés and cloud kitchens** in India.
- Expand penetration in **Tier-2 and Tier-3 cities** where restaurant digitization is still growing.
- Increase adoption among **multi-outlet restaurants and growing food chains**.
- Cross-sell additional solutions such as **Payroll, Tasks, Invoice and restaurant POS add-ons** to existing customers.
- Petpooja already has a strong customer base, with **1,00,000+ restaurants** using its restaurant POS, creating a strong foundation for further expansion.

MICRO FUNNEL BREAKDOWN

Metric	Example Scenario	Numbers / Assumptions
Total restaurants in target markets	Suppose Petpooja targets commercial F&B outlets (QSRs, fine dining, cafes, bakeries, cloud kitchens, and bars) across tier-1, tier-2, and tier-3 cities in India. Total potential addressable F&B outlets in target regions.	**1,500,000 outlets**
Reachable audience via marketing/digital	Suppose through digital ads, field sales/ground teams across 60+ cities, outbound outreach, inbound content marketing, and channel partners, Petpooja reaches ~20% of these total outlets.	**300,000 outlets**
Conversion rate	Suppose ~8.33% conversion (booking a demo/trial and successfully onboarding as paying customers) among the reachable audience in Year 1 $\rightarrow$ ~25,000 new restaurant subscriptions.	**25,000 new subscriptions**
Avg order value (AOV) / Annual Contract Value (ACV)	Assume standard annual SaaS subscription fee + initial onboarding fee $\approx$ ₹10,000–₹12,000 (excl. add-ons/hardware) per restaurant per year.	**₹10,000 (~USD 120)**

COMPETITOR ANALYSIS

Restroworks *(formerly POSist)*

Category	Analysis
MARKET REACH	Strong enterprise presence across national and international multi-chain operations, quick-service restaurant (QSR) chains, and hotel F&B networks. Dominates large-scale enterprise restaurant accounts across Tier-1 and global markets.
BRAND PERCEPTION	Widely recognized as a robust, enterprise-grade restaurant management and POS ecosystem. Perceived as high-end, powerful, and built for complex multi-location governance.
TARGET KEYWORDS	Competes aggressively on high-intent enterprise SaaS terms, including "enterprise restaurant POS", "multi-chain POS software", "cloud kitchen management system", and "POSist alternatives".
KEY STRENGTH	Deep central inventory, advanced multi-outlet management, global multi-currency compliance, and custom integration architecture for enterprise F&B brands.
KEY WEAKNESS	High cost structure and complex, demo-led onboarding. Lacks the lightweight accessibility, local ground sales penetration, and budget pricing that appeal to independent tier-2/3 restaurants.

COMPETITOR ANALYSIS

LimeTray

- **Market Reach:** Strong footprint among online-first restaurants, delivery-heavy outlets, and brands building direct customer channels.
- **Brand Perception:** Seen as a marketing-first restaurant stack and digital ordering partner.
- **Target Keywords:** *"restaurant marketing software"*, *"online ordering system for restaurants"*, *"direct ordering portal"*.
- **Key Strength:** Robust native online ordering, CRM, and customer acquisition tools.
- **Key Weakness:** Weaker core POS features, KDS, and table-management depth compared to specialized POS platforms.

COMPETITOR ANALYSIS

GoFrugal POS

- **Market Reach:** Dominant presence across inventory-heavy hybrid retail and F&B businesses, sweet shops, and bakeries.
- **Brand Perception:** Recognized as an established, dependable retail ERP and inventory management provider.
- **Target Keywords:** *"restaurant inventory management POS"*, *"ERP for bakeries and restaurants"*, *"GST billing software"*.
- **Key Strength:** Exceptional recipe costing, ingredient-level tracking, and back-office stock depth.
- **Key Weakness:** Less intuitive modern UI/UX and slower rollout of third-party delivery/ordering integrations.

PETPOOJA

KEYWORD RESEARCH, CLUSTERING & MAPPING

KEYWORD RESEARCH

Regional / Local Intent	**Restaurant POS software India**	restaurant billing software in Mumbai, POS software provider Delhi, free restaurant billing software in Hindi
Informational	**How to start a cloud kitchen**	FSSAI license checklist for restaurant, liquor licence cost in India, restaurant profit margin calculation
Operations & Inventory	**Restaurant inventory management software**	recipe costing software, KOT system working principle, wastage tracking system for restaurants

DIGITAL STRATEGY ROADMAP

- **Focus on SEO optimization, Brand Awareness & Lead Generation via Google Ads (Search + Performance Max)**, Meta Ads (Facebook/Instagram targeting restaurant owners, cloud kitchen operators, and F&B entrepreneurs), and SEO-driven local content targeting tier-1, tier-2, and tier-3 market bases in **Months 1–2.**
- **Expand into retargeting (Google Display + Meta Custom Audiences)**, launch an educational F&B blog featuring operational growth guides (e.g., FSSAI licensing, menu engineering, and recipe costing), run video case study campaigns showcasing success stories from partner outlets, and initiate B2B influencer partnerships with F&B YouTubers, restaurant consultants, and hospitality WhatsApp communities in **Months 3–4**.
- **Expand into mobile app marketing (for Petpooja Merchant App & POS ecosystems)**, automated WhatsApp & email onboarding flows for demo requests and trial users, and strategic referral programs with kitchen equipment vendors, POS hardware suppliers, and regional aggregators. Scale ad budgets and launch high-intent retargeting flows (demo abandons, pricing page visitors, renewal reminders) in **Months 5–6** for sustainable inbound lead flow and higher onboarding conversions.

BLOG CONTENT FOR SEO

- **Use local language keywords (Hindi + regional terms)** to capture Tier-2 & Tier-3 restaurant owners searching for billing software (e.g., *restaurant billing software in Hindi*, *dukan ka hisab kitab app*).
- Create FAQ-rich posts- **helps with Google's featured snippets** for high-volume operational queries like FSSAI registration steps, GST rules for cloud kitchens, and POS hardware setups.
- **Add internal links from blogs to product pages (boosts conversions)**, routing readers directly to Petpooja's core feature modules like Swiggy/Zomato Integration, Inventory Management, and Online Ordering.
- **Focus on long-tail keywords (e.g., *best cloud kitchen software for small setup in Ahmedabad*)** to target high-intent, low-competition commercial searches.
- **Optimize for voice search (restaurant owners often use Google Assistant in Hindi/regional languages)** for quick queries like *"Petpooja customer care number"* or *"POS software kitne ka aata hai"*.
